## SUPERHOMES STORIES

SuperHomes is a rapidly expanding network of 200 pioneering homeowners who have refurbished their homes to achieve a carbon saving of at least 60%. SuperHomers share their experiences of sustainable refurbishment by hosting free open days across the UK.

SuperHome owners are really leading the way. We can all learn from them. Visit the SuperHomes YouTube channel and explore the videos about different SuperHomes. What combinations of measures did they install and how? What have the benefits and challenges been?

Also take a look at the SuperHome Database to find SuperHomes with particular measures installed and see if there are any near you.
